

Over and Underwatering

Overwatering	Normal	Underwatering
Limits supply of oxygen	Right amount of water & oxygen	Dehydrates the plant
Harms the roots	Healthy plant!	Kills the plant

Aqua-Pods help save the plants!

Aqua-Pods are all-natural, biodegradable sponges that helps the plant get the right amount of water from the soil

Nutrients	Sources
Nitrogen	Dried raw seaweed, Sodium Nitrate
Phosphate	Potato Skin, Bone Meal
Potash	Straw, Glaucanite (Greensand)
Alkaline	Almonds, Lima Beans
Acidic	Black Tea, Find-grounded coffee beans

1. Place banana/potato peels in the sun for 2 days to dry them
2. Crush the peels into small pieces
3. Fill the Aqua-Pods with the crushed peels
4. Place Aqua-Pods in the soil
5. Enjoy the healthy plants

How to place Aqua-Pods in garden:
